EDUCATION

- **Brown University**

B.S. Computer Science

May 2026

EXPERIENCE

- **Fidelity Investments**

Incoming Software Engineer

Starting Aug 10, 2026

- **Brown University Physics Department**

AI/ML Research Assistant

Sep 2025 – May 2026

- **Reinforcement Learning Systems:** Develop RL-based spacecraft simulation in Python/TensorFlow modeling navigation near black holes.
- **Full-Stack Platform:** Build React + backend system enabling real-time interaction between human users and AI agents.

- **Brown University Data Science Fellowship**

AI/ML Research Assistant

Sep 2025 – Jan 2026

- **LLM Systems:** Design retrieval-augmented tutoring system evaluating and improving student reasoning.

- **Fidelity Investments**

Mobile Engineer Intern

Jun 2025 – Aug 2025

- **iOS Infrastructure:** Led IRA dashboard personalization for 10M+ users using backend-driven architecture.

- **Rhode Island Hospital**

Software Engineer

Jun 2023 – Aug 2024

- **Scientific Systems:** Developed Python/JS tools integrating ImageJ, Fiji, and Nikon Elements for 10k+ microscopy images; reduced analysis time by 30%.

- **Fidelity Investments**

Software Engineer Intern

Jun 2024 – Aug 2024

- **Performance:** Reduced load time 50% through state management and architectural improvements.
- **End-to-End Ownership:** Built and deployed production features across Swift (MVVM), APIs, and backend systems.

- **Brown University Computer Science Department**

Software Engineer

Sep 2022 – Mar 2023

- **NASA Collaboration:** Led development of mobile app enabling exploration of stellar phenomena through sound/haptics.

LEADERSHIP

- **Brown University Data Science Department**

Teaching Assistant

Dec 2025 – Jan 2026

- **Instruction:** Teach statistical modeling in Python including regression, ANOVA, and logistic models.
- **AI Integration:** Assist the department in evaluating and integrating AI tools to support instruction, student learning, and course operations.

- **Nelson Fitness Center**

Supervisor

Apr 2023 – Present

- **Operations:** Supervise 20+ staff and manage performance tracking; resolve client issues efficiently.

PROJECTS

- **RC Car System:** Built embedded system using Arduino UNO R4, DFPlayer Mini, and ESP32-CAM.
- **Fitness Platform:** Built React application with personalized workout recommendation features.

SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, Swift, SQL
- **Frameworks, Libraries:** React, Node.js, TensorFlow, PyTorch
- **Tools:** Docker, AWS, Grafana, Git
